PROJECTS

My Projects (My Portfolio) (sivapullaiah.ccbp.tech)

Developed a website where people like interviewers can see list of projects that a person implemented

- Designed a banner section and the project cards using different HTML block, inline elements.
- Styled the website using CSS3 properties such as background, flex, and CSS box model properties and relative units such as vh, vw, and used absolute units such as px.

Technologies used: HTML, CSS, Bootstrap

Food Munch(food.ccbp.tech)

Developed a responsive website for Food Store where users can see a list of food items, detailed information about a food item, offers

- Designed page using following HTML structure elements like li, header, article, footer elements and different bootstrap components to show different sections in the website and different bootstrap classes for responsiveness through mobile-first approach.
- Implemented product youtube videos by using bootstrap embed and model components

Technologies used: HTML, CSS, Bootstrap

Online Book Store (Book Search) (sivabookstore.ccbp.tech)

Developed online bookstore which shows popular books for given words, user also can limit number of books he would like to see

- Fetched the paragraph from server asynchronously using fetch GET HTTP API call and implemented responsiveness using different Bootstrap classes through mobile-first approach.
- Implemented user inputs of book words and limits by using html form elements input, select and maintain that data using JavaScript event listeners.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap
